

One of Britain's most [] scientists says the coronavirus crisis has "exposed that the [] wasn't as well-prepared as it should have been". Sir Paul Nurse was [] as his leading research center began [] to carry out coronavirus tests. In an [] with the BBC, Sir Paul added that it wasn't the time to go into [] and it was important right now to work [] to get through it. Here's our [] editor Hugh Pym.

The first day of coronavirus testing at one of Britain's [] science research centers, the Francis Crick Institute. [] here used for work in other [], including cancer, have been [] to analyzing [] samples. Today, the government [] on academic and industry teams to help in a new national [] to boost virus testing. Had this come a little [] in the day, I asked the director, Sir Paul Nurse.

Well, I think that this [] Covid-19 has exposed that the country wasn't as well-prepared as it should have [] and we see that in a number of areas. I don't think [] is the time to go into that in [] detail because we all have to work together, all put our [] to the wheel and get [] it.
